

Palo Alto Networks: Prisma Access: Consistent Security Everywhere (LO) (EDU-318)

Days: 2

Course Overview: Your organization's cloud transformation is changing the way that your users access applications and the way that you deliver security protection. You need to enable secure access, protect users and applications, and control data – from anywhere. Multiple point products have been the standard approach, but they add cost and complexity, and leave gaps in your security posture. Now there's a better way – the secure access service edge (SASE). Palo Alto Networks is paving the way with Prisma Access.

The Prisma Access SASE Security: Design and Operation (EDU-318) course describes Prisma Access Secure Access Service Edge (SASE) and how it helps organizations embrace cloud and mobility by providing network and network security services from the cloud.

This course is intended for people in the fields of public cloud security and cybersecurity, or for anyone who wants to learn how to secure remote networks and mobile users.

Prerequisites: Participants should have a basic knowledge of cloud computing and the public cloud. Participants must complete the Firewall 9.0 Essentials: Configuration and Management course and the Panorama 9.0: Managing Firewalls at Scale course or have equivalent experience. Participants also must have experience with networking concepts including routing, switching, and IP addressing.

Audience:

- Security Engineers
- Security Administrators
- Security Operations Specialists
- Security Analysts
- Network Engineers

Course Objectives: Successful completion of this instructor-led course will help enhance your understanding of how to better protect your applications, remote networks, and mobile users using a SASE implementation.

OUTLINE:

This class is comprised of ten modules focusing on an overview of configuring, managing, and troubleshooting Prisma Access.

- Module 1: Prisma Access Overview
- Module 2: Planning and Design
- Module 3: Activate and Configure
- Module 4: Security Processing Nodes
- Module 5: Panorama Operations for Prisma Access
- Module 6: Remote Networks
- Module 7: Mobile Users
- Module 8: Tune, Monitor, and Troubleshoot
